

Step 1

What is exciting to you in dance history? Use this short in class presentation to share your thoughts on it.

Here, I want you to share some evidence, photographs and videos, about your topic of interest and let us know why should we care.

Create a powerpoint presentation with 3-5 slides to share your elevator pitch. The ppt should not be longer than 3 minutes.

Your presentation should have:

- Introduce your topic
- Identify any problems in the field
- Make a connection between the information you present in the powerpoint and something you recall from your class. One explicit connection is needed.

Step 2

I need an annotated bibliography with 5 sources:

3 scholarly and 2 online

Step 3

You need to meet with your communication consultant and reframe your ideas around your research project as you start investigating more about it.

Write a reflection on how your meeting changed your thinking regarding your project?

You need to meet at least **once** before April 26, when your report is due.

Step 4

The research proposal should convey your interest in your area. It should tell us what other scholars are thinking in that field. It should also tell its your research questions, methodology, and theoretical frameworks. Finally, it should tell us your thesis statement.

Answer each of the following questions. Compose them in a word-processing software and submit your document to the dropbox.

1. Write a few sentences/questions about what you want to speak about for your research presentation, and why you are interested in it.

2. What kinds of sources do you envision yourself needing for gathering your movement description and other evidence?
3. Choose one article or chapter we've read in which the author frames their project very clearly. What about it makes it so clear? Who do they imagine their audience to be?
4. Your audience is your classmates. How do you imagine framing your project with this in mind?

Step 5

You will write an abstract for your presentation in class in a workshop activity.

The final abstract will be due on April 19

Step 6

Final Presentation
